

AYUB MEDICAL COMPLEX ABBOTTABAD

Diagnostic Services Overview

Knowledge Base Category: Departments

Laboratory Services

Laboratory services support diagnosis and monitoring through analysis of blood, urine, and other specimens. Test availability and preparation requirements vary by examination.

Radiology Services

Radiology supports diagnosis through imaging examinations selected by the clinical team based on the patient's presentation.

Specimen Handling

- Use the designated collection area.
- Provide correct patient identifiers.
- Follow staff instructions for specimen collection and preparation.
- Do not independently relabel specimens.

Results

- Results should be interpreted by an appropriately qualified clinician in clinical context.
- Patients should use designated channels to receive reports.
- Critical findings may require communication through clinical channels.

Synthetic sample content for RAG testing. This is not an official Ayub Medical Complex policy, clinical protocol, contact directory, or medical advice. Replace with verified institutional documents before production use.
