

AYUB MEDICAL COMPLEX ABBOTTABAD

Emergency Triage Guide

Knowledge Base Category: Emergency

Purpose

This high-level document is designed for RAG retrieval testing. It is not a substitute for professional emergency protocols.

Priority Principles

- Patients with immediately life-threatening conditions require rapid assessment and stabilization.
- Emergency patients are prioritized according to urgency rather than simply arrival order.
- Reassessment may change priority if symptoms evolve.

Examples of High-Urgency Presentations

- Severe difficulty breathing.
- Loss of consciousness or markedly altered responsiveness.
- Major uncontrolled bleeding.
- Suspected stroke symptoms such as sudden weakness or speech difficulty.
- Severe chest pain.
- Major trauma.

Triage Information

- Presenting complaint and onset.
- Vital signs and clinical observations.
- Known allergies and current medications when available.
- Relevant medical history.
- Mechanism of injury for trauma cases.

Synthetic sample content for RAG testing. This is not an official Ayub Medical Complex policy, clinical protocol, contact directory, or medical advice. Replace with verified institutional documents before production use.
