

AYUB MEDICAL COMPLEX ABBOTTABAD

Incident Reporting and Fall Prevention

Knowledge Base Category: Patient Safety

Incident Reporting

Safety incidents, near misses, medication errors, identification concerns, falls, and equipment problems should be reported through the hospital's authorized safety-reporting process.

Near Misses

A near miss is an event that could have caused harm but was detected or prevented before reaching the patient. Reporting can help identify system weaknesses.

Fall Prevention

- Assess fall risk according to clinical procedures.
- Keep pathways clear.
- Provide appropriate assistance.
- Use mobility aids and supervision according to the care plan.
- Report falls promptly for clinical assessment and documentation.

After an Incident

- Provide immediate clinical assessment as required.
- Notify the responsible team.
- Document relevant facts accurately and objectively.
- Complete the authorized incident report.
- Participate in follow-up review when requested.
