

AYUB MEDICAL COMPLEX ABBOTTABAD

Admissions Guide

Knowledge Base Category: Admissions

Purpose

This guide explains a typical admission workflow for patients and attendants, including registration, clinical assessment, bed allocation, and inpatient documentation.

Admission Workflow

- Patient arrives at the appropriate registration or clinical service point.
- Registration staff verify demographic and contact information.
- A clinician assesses the patient and determines whether inpatient admission is clinically indicated.
- An admission request is documented and an appropriate ward or service is identified, subject to availability.
- Required administrative forms are completed by the patient or authorized attendant.
- The receiving ward confirms the transfer and begins the inpatient care process.

Common Information

Patient identity	Full name, age/date of birth, and identification information where applicable
Contact details	Phone number and address of patient or authorized attendant
Clinical information	Referral, assessment notes, reason for admission, relevant history
Administrative information	Admission request and payment/coverage information where applicable

Important Notes

- Emergency clinical needs take priority over routine administrative processing.
- Bed availability may affect admission timing and ward placement.
- Only authorized staff should modify patient records.
