

AYUB MEDICAL COMPLEX ABBOTTABAD

Emergency Patient Information

Knowledge Base Category: Emergency

When to Seek Emergency Care

- Severe breathing problems.
- Severe chest pain.
- Uncontrolled bleeding.
- Sudden loss of consciousness.
- Major trauma.
- Sudden neurological symptoms such as weakness or difficulty speaking.

What to Bring

- Identification if available.
- Medication list or medication containers when practical.
- Known allergy information.
- Recent medical reports relevant to the emergency.

During Emergency Care

- Emergency teams may perform tests or procedures rapidly when clinically required.
- Information may be obtained from the patient, attendant, records, and investigations.
- Admission or discharge decisions are made by the responsible clinical team.

Important

For a real emergency, use an appropriate emergency medical service. This sample document is intended only for knowledge-base testing.

Synthetic sample content for RAG testing. This is not an official Ayub Medical Complex policy, clinical protocol, contact directory, or medical advice. Replace with verified institutional documents before production use.
