

AYUB MEDICAL COMPLEX ABBOTTABAD

Patient Identification Safety

Knowledge Base Category: Patient Safety

Purpose

Correct patient identification reduces errors involving medication, investigations, procedures, and documentation.

Identification Principles

- Use approved patient identifiers before providing care or performing procedures.
- Do not rely only on bed number or physical location.
- Ask the patient to state identifiers when possible.
- Resolve discrepancies before proceeding whenever safely possible.

High-Risk Moments

- Medication administration.
- Specimen collection.
- Blood-product processes.
- Diagnostic procedures.
- Ward or department transfers.
- Discharge documentation.

Escalation

If identifiers do not match across orders, labels, documents, or systems, pause the affected process where clinically safe and contact authorized staff.

Synthetic sample content for RAG testing. This is not an official Ayub Medical Complex policy, clinical protocol, contact directory, or medical advice. Replace with verified institutional documents before production use.
